

Candidate Peace Pledge

www.candidatepeacepledge.org

There is a strong desire for peace both within the United States and around the world. Awareness continues to grow that the use of warfare rather than peacemaking has created dangerous fallout, the impacts of which affect everyone. This is the time to recommit to peacemaking.

Therefore, it is imperative that all elected officials commit to address the tragic environmental, financial, and human costs of US militarism. I understand that not only federal funding goes to militarism, but that state and local governments also fund the military.

As a candidate for elected office I commit to this Candidate Peace Pledge.

1. I will work to end the global epidemic of violence by prioritizing diplomacy, peacemaking, and the demilitarization of the police. I will work to stop war, declared or undeclared, and oppose asymmetric uses of airpower and the proliferation of special operations.

2. If elected or re-elected, I will prioritize economic conversion, demilitarizing the economy and holding the Pentagon accountable.

3. I will work for the cleanup of all toxic military sites and protection of the public health. Biological, chemical and nuclear warfare research, development, use, and waste across the US and around the world has resulted in the destruction of human and environmental health. It is an obligation of government at all levels to repair the damage to the highest degree possible.
